**AUTOMATIC VOLTAGE REGULATOR (RELAY)**

Automatically regulates the output voltage, with a printed circuit board and relay as its main components. Has three stages of electronic relays with an overall voltage range of 70V (2 Up, 1 Down).

**AUTOMATIC VOLTAGE REGULATOR (SERVO)**

Automatically regulates the output voltage. Controlled by a servo motor, which is more accurate and responds more rapidly. Ideal for delicate devices such as medical equipments.

**AVR RELAY SERIES**
